

Giannis Sifakis

Web Developer

Athens, Greece | gian.sifakis@gmail.com | sifakis.dev | github.com/giansifakis | linkedin.com/in/giannis-sifakis-03b30b240

PROFESSIONAL PROFILE

Web Developer based in Athens, with experience in websites, digital platforms, web applications and e-learning environments.

I have been working with websites and digital projects since 2015 - first as a freelancer, and since 2023 as part of KMOP, where I develop and maintain websites, platforms and digital tools.

My work focuses on clean development, thoughtful structure and practical digital solutions. I enjoy turning content, ideas and technical requirements into clear, functional and user-friendly online experiences.

WORK EXPERIENCE

Web Developer

KMOP | March 2023 - Present

Develop, maintain and support a large ecosystem of websites, platforms and digital tools. My role includes maintaining more than 200 websites and platforms, digitizing educational material, developing web applications, designing websites and providing digital support both internally and to collaborating partners.

- Maintain and support 200+ websites and digital platforms.
- Develop web applications, websites and project-based digital tools.
- Design and structure websites with a focus on usability, clarity and content organization.
- Digitize educational material and structure online learning experiences.
- Provide technical and digital support to the organization and collaborating partners.
- Work with WordPress, Moodle, PHP, CMS platforms, APIs and e-learning tools.

Freelance Web Developer

Freelance | June 2015 - December 2022

Developed websites for different clients and supported the full setup process around small web projects, from hosting and server configuration to webmail, newsletters and content management. Also worked occasionally on video production and social media management.

- Developed websites for various clients.
- Set up websites on hosting and server environments.
- Managed webmail, newsletters and basic digital communication workflows.
- Supported content updates, website administration and CMS-based work.
- Worked occasionally on video production and social media management tasks.

SELECTED PROJECTS

Implicit Association Test Platform

Custom PHP application developed from scratch for Headway and used by KMOP as a digital tool for exploring automatic associations around gender, career and family.

Technologies: PHP, JavaScript, HTML, CSS, custom application logic

Link: <https://iat.kmop.org/>

Early Warning Mechanism

Multilingual WordPress-based monitoring platform for civil society organisations in Greece, Cyprus, Bulgaria and Italy, developed with custom plugins, registration flows, questionnaire logic and country-based results.

Technologies: WordPress, PHP, custom plugins, multilingual setup, questionnaire system

Link: <https://www.civicchampionsproject.eu/>

Racism Victim Support

Multilingual WordPress platform for the Ministry of Social Cohesion and Family, designed to provide information, services, rights and educational material for people who have experienced racism, discrimination or intolerance.

Technologies: WordPress, multilingual content structure, CMS development, content organization

Link: <https://racism-victim-support.gr/>

DigiLEAD E-learning Platform

Multilingual e-learning platform developed in Moodle for the DigiLEAD project. Educational material was digitized through the Adapt authoring tool and structured into interactive learning modules in five languages.

Technologies: Moodle, Adapt authoring tool, SCORM/e-learning content, instructional design, multilingual course structure

Link: <https://digilead.kmop.org/>

Live Without Bullying Website

WordPress website for the Live Without Bullying initiative, providing information, videos, educational material and useful resources about bullying for students, educators and parents.

Technologies: WordPress, CMS development, educational material, content structure

Link: <https://livewithoutbullying.com/>

Our Place to Grow

WordPress platform for municipalities in North Macedonia to present and update their actions for child protection and local planning, including municipality accounts, multilingual content and an interactive map.

Technologies: WordPress, user accounts, interactive map, multilingual setup, CMS structure

Link: <https://www.ourplacetogrow.mk/>
